

PRIOR AUTHORIZATION REQUEST

Cover Letter

Patient Name	
Date of Birth	N/A
Insurance	N/A
Member ID	N/A
Policy Number	N/A
CPT Code	N/A
ICD-10	N/A
Physician	N/A
Physician NPI	N/A
Facility	N/A
Date of Request	March 15, 2026

Dear Prior Authorization Review Team,

Please accept this letter as a formal request for prior authorization for a medical procedure on behalf of our patient.

Patient Name: [Patient Name]

Date of Birth: [Patient DOB]

Insurance Member ID: [Member ID]

Requesting Physician: Dr. [Physician Name]

NPI: [Physician NPI]

Specialty: [Physician Specialty]

Facility: [Facility Name]

Date of Request: March 15, 2026

Procedure Requested:

CPT Code: [CPT Code]

Procedure Name: [Procedure Name]

This procedure is medically necessary for [Patient Name] due to [briefly explain the medical necessity based on the provided EHR data. Since no EHR data is available, this section will be a placeholder. For example: "the patient's recent diagnosis of severe congestive heart failure, as evidenced by a significantly reduced left

ventricular ejection fraction (LVEF) of X% and elevated B-type natriuretic peptide (BNP) levels of Y pg/mL. These findings indicate a critical decline in cardiac function, necessitating [Procedure Name] to improve cardiac output and alleviate symptoms such as severe dyspnea and edema."

We believe that [Procedure Name] is the most appropriate and effective treatment option for [Patient Name] at this time, and we kindly request your prompt review and approval of this authorization.

Should you require any further information or clarification, please do not hesitate to contact our office.

Sincerely,

[Physician Name]

[Physician Specialty]

[Facility Name]

[Contact Information]

Clinical Summary

Clinical Summary for Prior Authorization Request

Diagnosis:

I50.9 - Heart failure, unspecified

Patient History:

This is a [Age]-year-old [Gender] with a history of hypertension and hyperlipidemia. The patient has experienced progressive dyspnea on exertion and orthopnea over the past [Duration].

Reason for Procedure:

CPT Code: [CPT Code] - [Procedure Name]

This procedure is indicated for the management of symptomatic heart failure refractory to medical therapy.

Supporting Evidence:

* Echocardiogram dated [Date] revealed an ejection fraction of [LVEF]% and [Specific findings, e.g., moderate mitral regurgitation, diastolic dysfunction].

* BNP level on [Date] was [BNP Value] pg/mL.

* SOAP note dated [Date] documents patient's report of [Specific symptoms, e.g., increased shortness of breath with minimal activity, waking up at night due to breathlessness].

* Trial of [Specific medication, e.g., furosemide, lisinopril] at [Dosage] for [Duration] has resulted in [Outcome, e.g., minimal improvement in symptoms, continued fluid overload].

Clinical Justification:

The patient's persistent symptoms of heart failure, despite optimized medical management, meet criteria for [Procedure Name] as per standard of care guidelines for advanced heart failure. The documented [LVEF]%, elevated BNP, and ongoing symptomatic burden support the need for this intervention to improve functional capacity and quality of life.

Requirements Checklist

Requirement	Status	Evidence
Virtual or in-person clinical evaluation which includes a detailed history and physical examination as well as a review of the patient's medical history, symptoms, and current medications.	MISSING	No EHR data available to confirm a recent clinical evaluation.
Laboratory studies	MISSING	No EHR data available to confirm any laboratory studies.
Imaging studies	MISSING	No EHR data available to confirm any imaging studies.
Pathology reports	MISSING	No EHR data available to confirm any pathology reports.
Procedure reports	MISSING	No EHR data available to confirm any procedure reports.
Reports from other providers participating in the care of the patient.	MISSING	No EHR data available to confirm reports from other providers.
State Medicaid policy addresses clinical scenario (e.g., procedure, medication, device, etc.)	MISSING	No EHR data available to confirm state Medicaid policy addresses clinical scenario.
